Complaint Summary Log for Traditional Relay Services

Date of Complaint	Nature of Complaint	Date of Resolution	Explanation of Resolution
June 2004			
06/03/04	TTY customer having problem calling to another local number. Customer gets recording that number calling is disconnected.	06/16/04	I apologized for the problem and opened Trouble Ticket 1001837959 for problem resolution. Resolved by Sprint: Account Manager followed up. Suggested they contact their LEC to check the line.
06/06/04	CA 1685 "poorest reading of my sentence . . . name, phone # etc". TTY user said CA kept asking to repeat information: CA wasn't reading information/message clearly.	06/06/04	CA stated that the TTY user provided two names and two different numbers using other LD carrier. CA was attempting to get some clarification before the call was placed. (None of the two numbers provided matched the calling card number, therefore clarification was attempted) CA followed proper CA protocol in this particular situation.
06/21/04	Called Relay from work; heard tones. PBX	06/21/04	Explained to customer about the PBX system and suggested they contact their telecommunications manager to check out their line.
06/24/04	Customer stated that around 7:30 a.m. a CA disconnected him/her. Customer did not have CA's ID and would like for us to "trace" the call to this CA to ensure that this CA would not disconnect the customer again.	06/24/04	Apologized to the customer for the inconvenience and explained that we do not keep record of such calls. Upon customer's insistence, I assured her I would forward this to appropriate personnel. Customer provided the number for tracing purposes.
06/24/04	Customer not finished placing my call. I wanted to dial another number and the operator hung up on me.	06/28/04	CA discussion: Coached CA on disconnect procedure. CA did say this customer may have come in after having been disconnected and was confused on the CA number.
06/29/04	Customer asked Relay to dial number. CA let the phone ring five times then typed THANKS FOR USING RELAY SERVICES BYE. Caller wants to know why they were not informed of what was going on.	06/10/04	Customer Contact received by Cathy Wright. Original Tracking # 2230. Trish Shipley called customer on 7-6 @ 12:35 p.m., 3:30 p.m., 3:45 p.m. and 7-7 @ 4:00 p.m.: line busy. Forwarded to account manager to close out.
06/29/04	Customer said the number she is trying to call is going through. Line said number was not in service.	06/29/04	The sprint technician dialed the number and reached the recording stating the number was not in service. When dialing it again, it went through to a voice mail. The Sprint technician said it is a LEC issue for that number. Calling to 651-xxx-xxxx worked, called through relay and it worked; updated customer. Told customer to have the line checked with the LEC.
06/30/04	Customer stated that he/she place a call to a Doctor's office around 9:54 a.m.. According to the customer, there were a lot of poor spelling and the typing was extremely slow. There was also a long lag time after the GA was given. Customer said that he/she is a fast typist and the lag time shouldn't be that long. The call did not go well so customer had to hang up.	06/30/04	CA was coached on importance of promptness of relaying information between two callers. CA was also coached on proper phrases to use when educating voice person to speak at a normal pace. Acknowledged there were some typos and spelling errors.

07/05/04	Customer stated she gave the CA a number to dial for T-Mobile Customer Service and that the CA hung up on her.	07/06/04	Apologized to the customer and said that we would look into what happened. Met with CA and WFA. Disconnect actually took place when CA taking over her call was adjusting the station and had not yet notified TTY user of CA change. As new CA was adjusting station height, cord came unplugged and call disconnected.
07/06/04	Called into Relay from work the past two weeks. Heard TTY tones.	07/06/04	Explained that Relay connects on mode that was last used from the number they are calling from. Someone had placed a TTY call to Relay in the past, resulting Relay answering in TTY.
07/21/04	Customer stated that an CA hung up on him within the last hour. Did not provide the CA number and insisted that we check the call logs in the last hour and find the CAs who disconnected him. Insisted that we check the CAs who received his number and track those CAs.	07/21/04	Apologized to the customer for inconvenience and explained that I was the one who disconnected him after I exhausted the disconnection protocol. Since no legitimate complaint was given as well as no calling to number was provided.
07/22/04	Caller complained about call that took place today. TTY was upset that the CA threatened to cause the problem with own voice person when I hung up on your CA. Said they hung up over and over but the CA didn't disconnect and did not keep their privacy with sensitive medical information. After identifying myself as supervisor. I asked when this happened and would the caller like a follow up call from someone after a meeting with this CA. Both times the TTY user became abusive and vulgar.	07/27/04	Supervisor Bonnie had assisted on this call and said CA followed all customer instructions and did everything appropriately. Supervisor attempted to talk to inbound to determine what the complaint actually was but they became abusive and hung up.
07/25/04	TTY customer called to say that "When I told CA my directions they ignored my request and won't respond to me".	07/25/04	Apologized to the customer. No contact requested.
07/25/04	Customer said CA did not follow instructions. Customer had asked for computer tech support and CA typed tech support. Apologized to customer and said contact would be filled out.	07/25/04	Coached CA on typing entire request and keeping customer informed. CA said customer was verbally abusive and did not understand what CA was typing.

08/09/04	Customer made Relay call at 2:00 a.m. and said CA was swearing and did not connect them to the TTY party they were trying to reach.	08/10/04	CA said caller was a child using profanity. CA said he did not swear at customer. CA coached on getting supervisor assistance immediately in a situation like this.
08/12/04	Customer wanted to place a TTY to TTY call through Relay. Told CA that he needed to leave his number before he dials number to call. CA waited too long to say anything like "ringing number" and the CA said that the number is not available and hung up without asking if I would like to place another call.	08/14/04	Thanked customer for calling with this information. TTY to TTY procedures reviewed with CA. CA understands correct procedure.
08/13/04	Called into Relay from work; heard TTY tones.	08/13/04	Explained that Relay connects on the mode that was last used from the number they are calling from. Someone used a TTY to call Relay in the past, resulting the Relay to answer in TTY.
08/16/04	Customer stated that she was disconnected and wanted a follow up of a reason for the disconnection.	08/16/04	Apologized to customer and will complete report. Faxing to appropriate center for CA follow up.
08/17/04	CA did not send (person hung up)... soon enough after they typed SKSK. Customer then asked CA why... CA told them procedure and continued to explain that they "were one of the best" CA's.	08/17/04	Explained that CA should have spaced or sent ... to indicated time passing. Explained that CA should not give personal info or opinions about themselves. Reviewed with CA over keeping customer informed as best as possible, including spacing/... to indicate time. Reviewed appropriate way to handle customer questions; what we can say and can not say, and when to request a supervisor.
08/19/04	Customer is having trouble being connected, not only with CA 9141, but many different CAs and on different occasions. Sometimes customer will get an CA that can connect the first time but most of them can't and the VCO, after saying hello 5 times hangs up because they don't know what is going on.	08/25/04	Apologized for the inconvenience. Met with CA. CA stated that by the time he had the call set up the VCO user had disconnected. Coached CA on VCO set up procedures.
08/19/04	CA did not leave complete message for interpreter to cancel which led to Relay user having to pay interpreter fees for services that were not needed. She would like to be reimbursed for the interpreter fees.	08/21/04	Reviewed with CA 1480 the importance of always following customer instructions thoroughly as well as relaying everything verbatim and informing customer if, for some reason, it is not possible.
08/22/04	Customer said CA was swearing at them during a Relay call. They did not want to be any more specific.	08/22/04	Thanked customer for information. Reviewed NEVER saying inappropriate comments during Relay call. Does know may have to use swear words if it is part of what TTY typed during Relay call.
08/24/04	Customer said CA was swearing and being "snotty". Would not give details as to why the CA was being this way.	08/24/04	Apologized and said a Customer Contact would be filled out. No CA with that number. Not able to do follow up.

12/02/04	The customer stated that CA #1886 would not process her 800 call because the long distance number is restricted. According to her, the customer service rep has removed all of her restricted number. She also wanted to remove other features.	12/02/04	CA followed proper procedure and the call was placed and customer was informed that the long distance call is restricted. They did not give a specific issue on the CA just said that the call did not work and was disconnected, but they weren't sure if the bank disconnected or if the CA disconnected.	01/12/05	I explained that it sounded like the issue was more with the bank recording than the CA and that they may want to contact their bank to see if they were having issues with their recorded bank information lines. They did not indicate to me interest in follow up.
